IMAGE EXHIBITION SPACE

SECULAR THEATRE

BECA ARQUÍA

2016

Emperor Hadrian enjoyed a very particular habit at the time, was in the habit of retiring to Teatro Marittimo Villa Adriana, as an object of study of astrology. There could move away, isolated and decide how to convince the Senate next trip to east. Even he used to think how to hide the death of the architect of the empire.

The theater is a path to secularization, a review of the values in humans. The religious sphere gives way to a more civil (non-theological) through the hosting of the information through the senses. But above all it gets deeper into the purest source of this information.

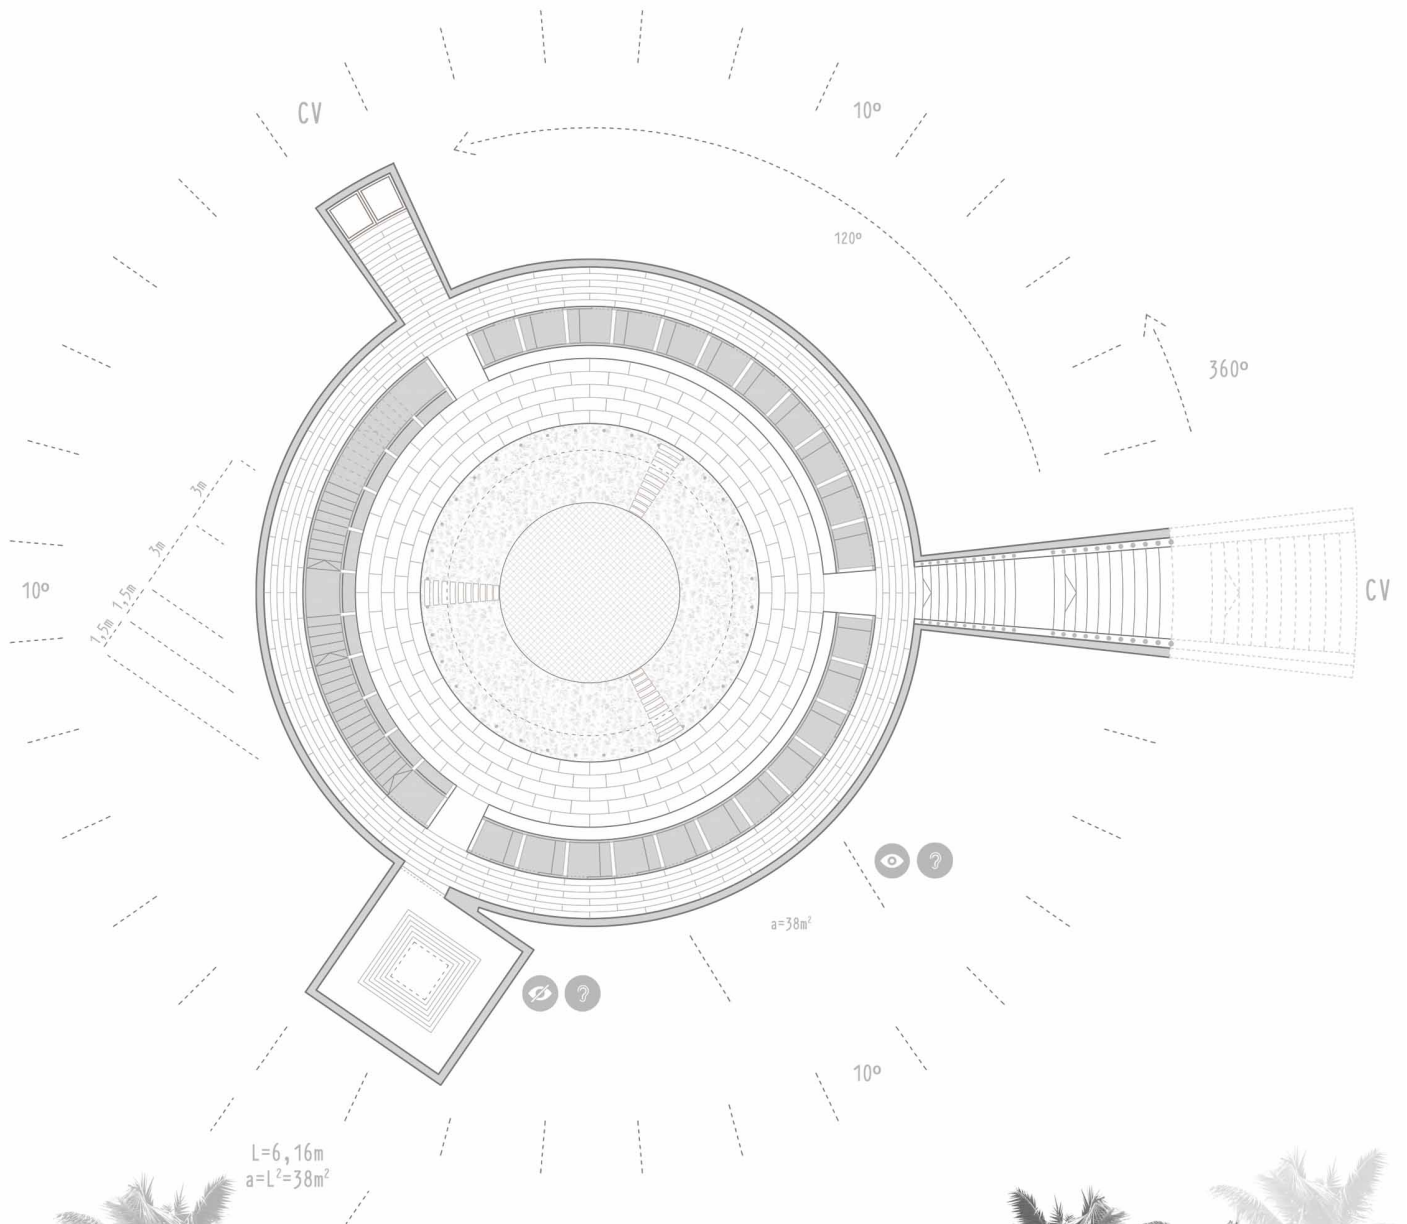

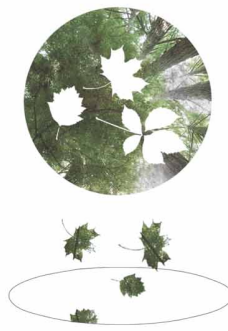

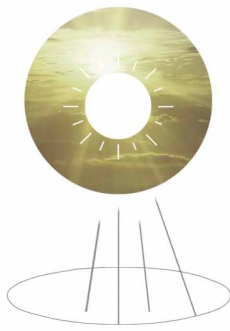

Secular Chapel seeks to emphasize the environment in which this information (oculus and fire-place) is transmitted. This is a medium that only emits natural elements (sky, sun, clouds, vegetation, wildlife, moon and perhaps silence), values that this space puts on the rise and that gives a priority lacking in our environments urban.

The senses, sight, hearing and smell will be responsible for translating all the information through two distinct spaces, one square and one round.

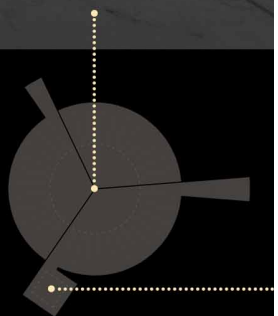

No landmarks in the city or coordinates N, S, E and O the person loses his orientation once inside, resuming their civil and worldly condition.

It is located northwest of the project by the Agence TER and Ana Coello, away from the main node of the plaza de les Glories and direct access from the city of Barcelona. As vertical communication have the main entrance, a secular path ending in a splayed stairs, playing with perspective, here begins the dive.

TO WHOM IT MAY CONCERN

It is with pleasure that I offer a recommendation on behalf of **Luis López**, architect. I know him personally. He has followed my lessons during several years since 2008 (Architectural Theory and Architectural Design). We have shared countless activities in the University, which include workshops, summer trips, courses and lectures. With the closest interest I have followed his Final Master Project, which he has developed in Porto with the highest success.

He has been a serious, tireless worker, talented student who has a stunning aptitude for architectural design. He works in an accurate way and he is accustomed to work as a team member in a very positive way. During the last years, he has achieved remarkable graphic and computing skills. He has also shown a veritable passion in architecture, graphic arts and other creative disciplines.

He has, therefore, a very complete preparation in order to work in an intricate career like architectural work is. He is willing to take on any responsibilities. Architect López has a versatile ability that makes him perfect for different occupations on architectural job.

I feel absolutely confident about him and his success in any job, and I think undoubtedly he will not let you down. I will provide gladly further comments if required.

José Ángel Hidalgo Arellano, PhD architect
